### Applications

ENTRANCE GRILLES:

LEVEL BED OR PIT APPLICATIONS

AIR GRILLES

LIGHT DIFFUSERS

CEILING AND WALL APPLICATIONS

### Specifications

#### Section 12 48 16 Entrance Floor Grilles

Furnish and install Bar Clean Tread Model KDAL, Aluminum Bar Grating as manufactured by Kadee Industries, Walton Hills, Ohio. Phone: (800) 321-3827

#### Construction

**Tread Bars** manufactured from 6063-T6 Extruded Aluminum with 1.175" x .25" tread bars. Tread bar surface is provided with round groove contours for improved cleaning action, running the length of the bar.

**Construction** Tread Bars are assembled with stainless steel rods, stainless steel nuts and nylon 66 spacers with a .25" max. slot opening.

**Framing** 6063-T6 Extruded Aluminum. Custom pit liners are available in aluminum for drainage and evaporation applications.

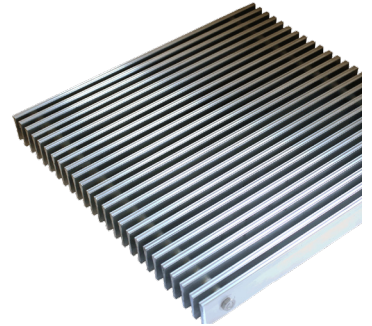

**Finish** Standard mill and Clear Anodized finish available for KDAL.

**Warranty** 2 years - details on back cover.

### Economical, Lightweight Aluminum Grating Sections

They're easy to handle, and hold-up well in numerous installations. As one of our most economical products, Kadee's aluminum grating only requires occasional mopping and can be lifted to remove dirt which has collected beneath the non-clogging tread bars, making this product virtually maintenance free.

- Designed for level bed or pit applications.
- Self cleaning design limits tracked-in dirt or mud.
- Designed for 50% free air flow, making this ideal for air registers.
- All metal tread bar design eliminates carpet maintenance.
- Custom designs available to fit almost any application.

## KDBR

### ARCHITECTURAL BRONZE BAR GRATING

Have your next project reflect the added luxury and prestige of Kadee's Architectural Bronze Grating. When style, functionality and durability are of the utmost importance, be sure to specify KDBR Architectural Bronze Grating. The construction of the KDBR is similar to the KDAL, with .8125" x .25" tread bars. Available with architectural bronze angle framing.

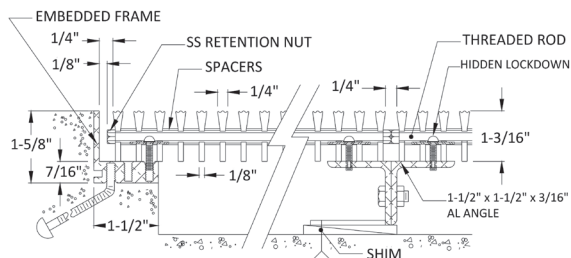

Add Beauty and Elegance to Your Design

### LEED Information

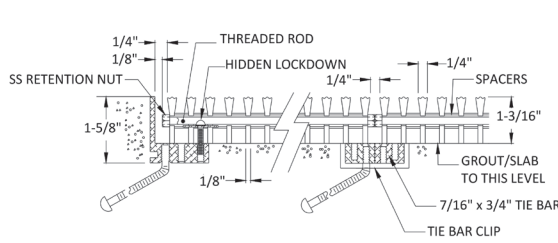

Aluminum is a unique metal: durable, flexible, lightweight, corrosion-resistant and 100% recyclable. Kadee Industries' Bar Clean Tread Aluminum Grating is manufactured from extruded aluminum comprised of 32.5% post-consumer recycled content and 32.5% pre-consumer recycled content.
