Furnish and install Bar Clean Tread Model KDAL-I Aluminum Bar Grating as manufactured by Kadee Industries, Twinsburg, Ohio.
Phone: (800) 321-3827

Construction:

- **KDAL-I Tread Bars:** Manufactured from 6000 Series Extruded Aluminum with 1" x 3/16" tread bars. Tread bar surface is provided with grooved contours for improved cleaning action, running the length of the bar. KDAL-I Tread Bars are assembled with pressure locked aluminum cross rods.
- **KDBR Tread Bars:** C385 Architectural Bronze assembled with stainless steel nuts and nylon 66 spacers with 1/4" opening between bars at top surface joints.
- **Framing:** 6063-T6 Extruded Aluminum. Custom pit liners are available in aluminum for drainage and evaporation applications.
- **Finish:** Standard-Mill, Anodized.
- **Surface:** Grooved Contours. OnGrip® abrasive traction safety surface finishes available upon request. OnGrip® not available for KDBR.

2 Year Warranty

ECONOMIC, LIGHTWEIGHT ALUMINUM GRATING SECTIONS

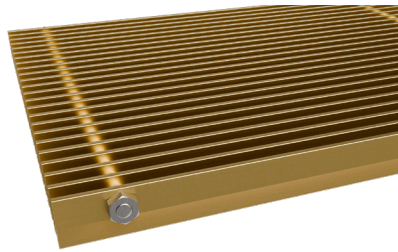

They're easy to handle, and hold up well in numerous installations. As one of our most economical products, Kadee's aluminum grating only requires occasional mopping and can be lifted to remove dirt which has collected beneath the non-clogging tread bars, making this product virtually maintenance free.

- Designed for level bed or pit applications.
- Self cleaning design limits tracked-in dirt or mud.
- Designed for 50% free air flow, making this ideal for air registers.
- Al metal tread bar design eliminates carpet maintenance

- Custom designs available to fit almost any application.
- Rolling Load Capacity
 - KDBR - 350 lbs. per wheel
 - KDAL-I - 1,000 lbs per wheel (level bed application only.)

ADD BEAUTY AND ELEGANCE TO YOUR DESIGN

KDBR

Architectural Bronze Bar Grating

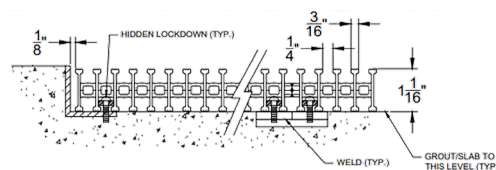

Have your next project reflect the added luxury and prestige of Kadee's Architectural Bronze Grating. When style, functionality and durability are of the utmost importance, be sure to specify KDBR Architectural Bronze Grating. The KDBR is similar to the KDAL-I, with .8" x .25" tread bars. Available with architectural bronze angle framing.

LEED INFORMATION

Aluminum is a unique metal: durable, flexible, lightweight, corrosion-resistant and 100% recyclable. Kadee Industries' Bar Clean Tread Aluminum Grating is manufactured from extruded aluminum comprised of 32.5% post-consumer recycled content and 32.5% pre-consumer recycled content.
